

FLOATING ISLANDS IN HAZERSAH (TURKEY)

In Hazersah, a village in the East, about one hour drive from Bingöl, in a middle of a very beautiful wide landscape, there is a small lake (300 square meters) in which there are three natural floating island. The lake is very deep. It has connections with underground river.

These Islands are a natural curiosity that is attracting visitors. Due to the risks that they may encounter in falling in the water but also because it is a fragile ecosystem, it is now closed by a fence. The partners have had the privilege to enter it to be able to see this natural phenomenon. Unfortunately the duration of the sponsorship event was reduced due to a very strong rain falling.
